DESKTOP MOUNTED PANEL SYSTEM

OUTLINES

DESKTOP MOUNTED PANEL SYSTEM

388 Gallery Suite with Outlines Transaction Top in Hardrock Maple

388 Double Workstation in Chestnut

Outlines is a versatile, desktop-mounted partition system that can be used on most new or existing modular work stations, reception areas and office desks.

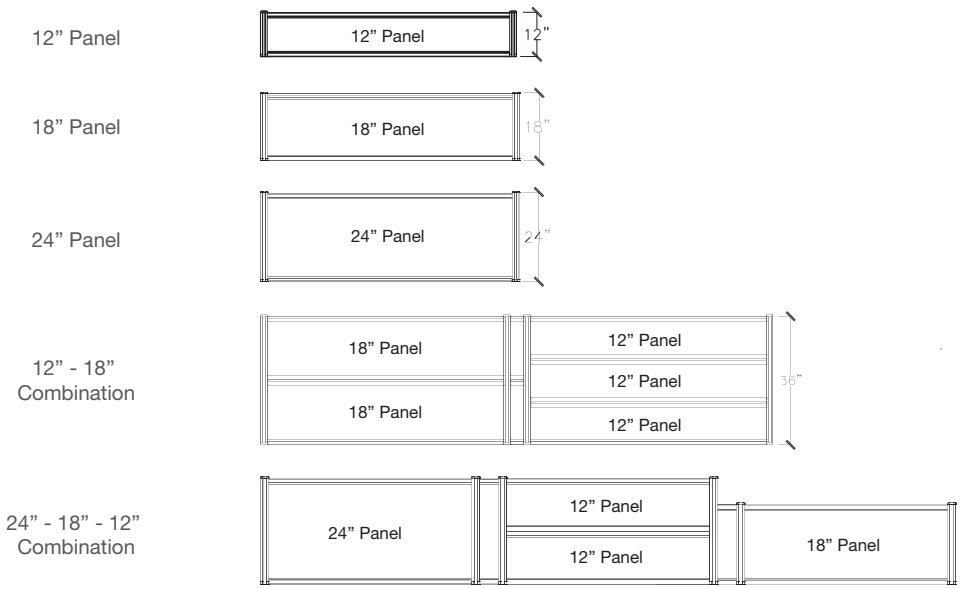
Posts, Panels and Tops are ordered separately allowing the designer maximum flexibility to create attractive and functional desk partitions. Combine the limitless partition options of Outlines with series Hutches and Tall Storage for the complete office layouts.

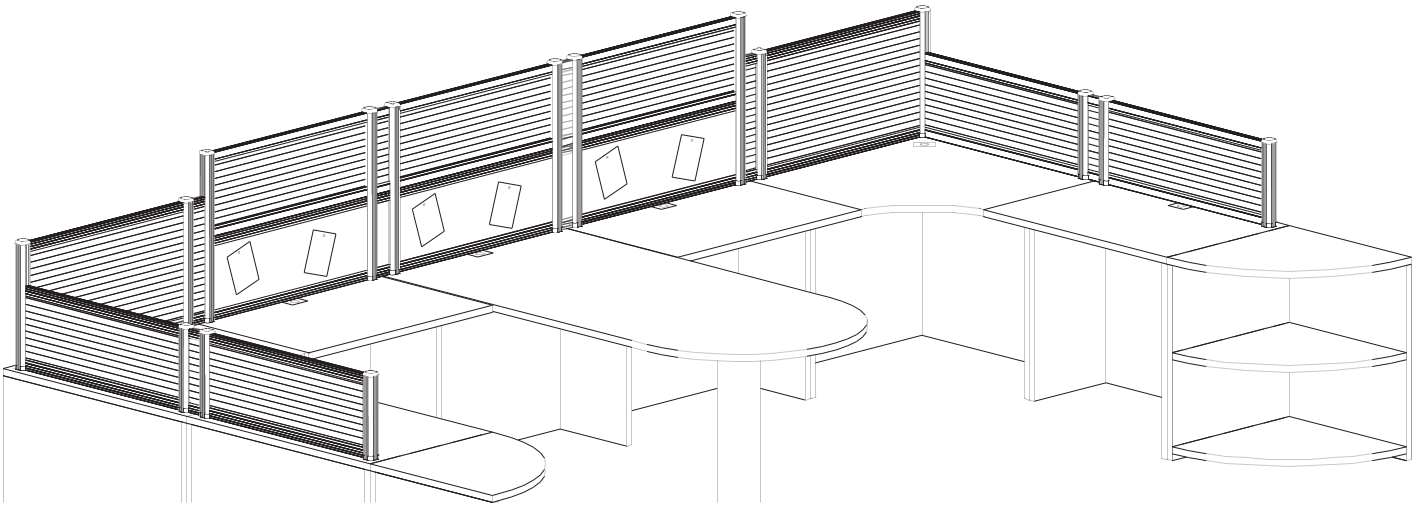
Choose from either Black or Aluminum coloured posts to coordinate with existing finishes. Select from three options for your panels to increase daylight or privacy as required. Three options available are: Ribbed Polycarbonate to allow maximum daylight while still obscuring visibility; Laminate panels to provide solid ‘walls’ using one of our 20 laminate finishes; or select one of our fabric tack boards to maximize usable space.

Using a combination of all three Panel options will allow you to completely customize each work area to provide efficient, cost effective workstations which can be reconfigured, or added to, at the drop of a hat!

388 Corner Station with Outlines Transaction Top in Sugar Maple

PANEL CONFIGURATIONS: OVERVIEW





ACCESSORIES

Along with the Posts, Panels and Tops, Outlines provides numerous accessories to optimize your work space further.

Hanging files, phone holders and paper trays help to relieve the pressure on your work surface area.
