SMARTLINK™
Student Desks

Innovation Takes Shape

Alone, in groups, or guided by a teacher, students learn in various ways. That's the lesson behind the SmartLink student desks from The HON Company. Part of a complete system, they easily accommodate any learning style, teaching activity, and both left- and right-handers. It's a fresh idea that allows you to build student involvement and a greater exchange of ideas in the learning environment.

ADAPTABLE

Innovative design allows student desks to be arranged into individual, collaborative, or teacher-centered configurations for different grade levels and activities.

VARIETY

Desk legs adjust from 23 to 33 inches, offering the perfect fit for a variety of students. A simple turn provides extra arm support for both right- and left-handed students. A fixed-height leg is also available.

COMFORTABLE

The unique desktop is spacious enough to hold either a laptop or netbook computer, as well as a workbook or textbook. Hang a backpack from an optional hook on the side for easy access to other materials. Comfort edges and radius corners keep student desks pleasant to the touch.

SAFEGUARDED

Student desks feature a durable worksurface that resists defacing. Nylon swivel glides slide effortlessly along carpet, and optional felt caps help reduce marring on vinyl floors.

SIT-TO-STAND

Ask students to sit still for hours and attention tends to wane. One solution: A desk that lets them work while standing up. The sit-to-stand student desk adjusts from 30 to 43 inches in 1-inch increments. Give students the option of greater mobility by placing a cluster of standing-height desks in the learning environment. They're a smart idea in collaborative areas, too.

COORDINATED

Part of a total solution, student desks feature the same rounded edges, color palette, and contemporary styling of other SmartLink components for a clean, unified look.
