

FLIP

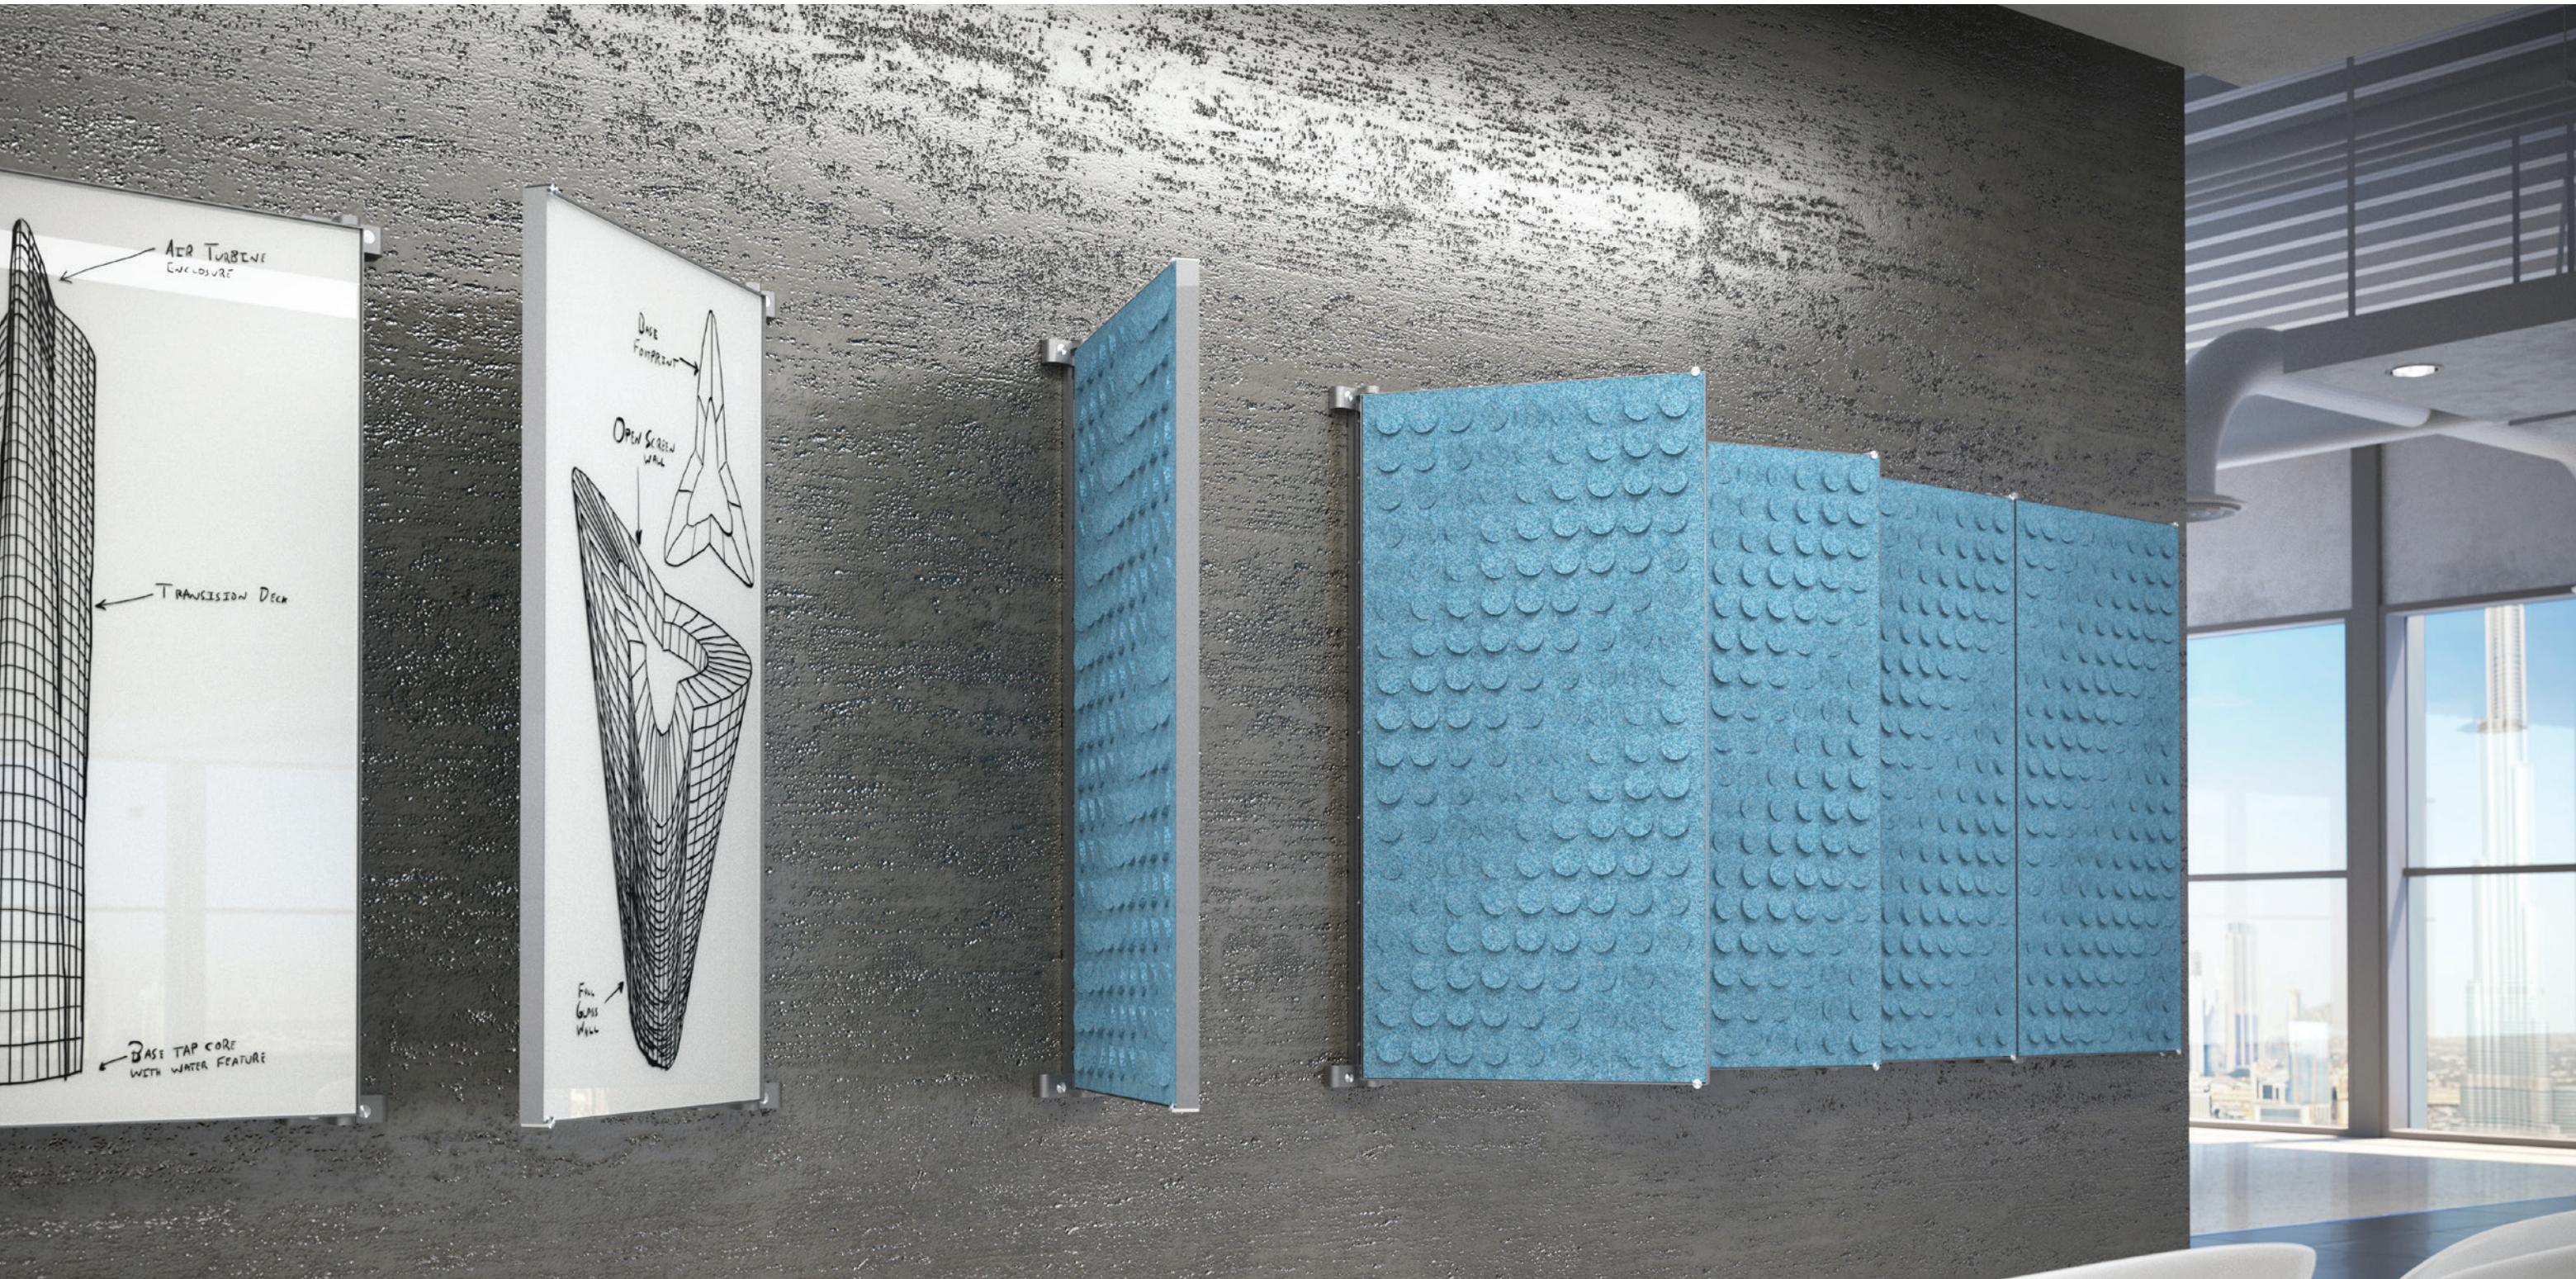

GLASS THAT MOVES

Why limit a Glassboard to one side? Re-think the way work spaces use writable surfaces with Flip by Clarus Glassboards. Flip allows both sides of a Clarus Board to be utilized for a heightened design aesthetic and elegant functionality.

GLASS THAT TRANSFORMS

A Clarus Glassboard when you need one, a piece of art when you don't. Designer Dony Dawson was inspired by minimalist design and simple lines while observing design trends in Europe. Enhance any space with a beautiful mix of Clarus Boards on one side and acoustical panels with custom prints, patterns and colors on the other side.

CLARUS FLIP

Never before has a Glassboard been able to move like Clarus Flip. Transform your space with a simple flip!
